

DIGITAL METER KITS

The CTP Digital Hour Meters features a digital display that records in hours and tenths. It records up to 100,000 hours and only records in the run position. The round gauges use a standard 2" opening. Some kits include required hardware for ease of installation.

BENEFITS OF RUNNING HOUR METERS:

- **Scheduling servicing:** Regular servicing helps to maintain expensive equipment in proper operating condition. This could avoid expensive breakdowns and downtime.
- **Determining warranty coverage:** Elapsed hours recorded by a meter will determine whether parts or equipment are still covered by the warranty.
- **Equipment resale and rental:** Industrial equipment are commonly rented out based on logged hours. Fewer operating hours make equipment more valuable during resale.
